TITLE: METHOD AND KIT FOR RAPID CONCURRENT IDENTIFICATION AND
ANTIMICROBIAL SUSCEPTIBILITY TESTING OF MICROORGANISMS
FROM BROTH CULTURE

Petition for Submitting Color Photographs or Drawings

Assistant Commissioner for Patents

Washington DC 20231

Dear Sirs:

Applicant hereby respectfully petitions that the color photographs filed herewith be accepted as formal drawings. The \$130 petition fee is enclosed.

These color photographs or drawings are necessary to show and illustrate the diagnostic value of the kit and method. Without color it would not be possible to show, for example, the following: (1) the difference in fermentation between two microorganisms growing in the same test chamber of a kit plate shown in Fig. 39D as manifest by the pink centered fermenting colony versus the non-pink centered non-fermentor. (2) The fluorescence of the E. coli microorganism growing on a medium containing the substrate MUG that becomes fluorescent when cleaved by the E.coli specific enzyme Beta glucuronidase. (3) The quantitative color difference between test chamber 53 and test chamber 54 in Fig. 39A illustrating a situation where only one of the microorganisms ferments the sugar lactose (chamber 53) but both ferment the sugar glucose in test chamber 54. (4) The color in Fig. 37A-37C allows for a better illustration of the antibiotic susceptibility testing when two microorganisms are present. The color allows for a much clearer definition of the two zones within the same test chambers under discussion. Without color, Fig. 38 would not be able to illustrate the difference in Gram staining of the two test organisms in Fig. 37A-37C. (5) The visualization of color is very important as far as determining the biochemical reaction differences among different microorganisms. These differences, as well as others not listed, allow for the identification of microorganisms by growing them on the kit plates as illustrated in Fig.25 to Fig.36. See the text of the specification for a complete description of the importance of the color reactions of the kit.
